

Family Zone Products Guide

Last Modified on 2022-03-03

Applies to: Insights Members, Premium Members

Family Zone centralizes online safety management in one location for parents. Family Zone connects parents to the activity of their children's many devices. Our products work with your child's school to hand over the management of the device to the school during school hours, too.

Devices

Phones and Tablets

Family Zone Apps for Android and Apple iOS mobile devices. How to get started:

- Android Tablets and Phones with a [Child](#) or [Parent](#) user
- Apple iOS iPhones and iPads with a [Child](#) or [Parent](#) user

Online Safety Tips and Help

An **Online Safety Hub** is available through participating Schools and to Premium Members (with or without a participating School). Online Hubs contain current online safety information from child psychologists, teachers, school counselors, and former law enforcement.

- [Online Safety Hub](#)

Parents get:

- Explaners and reviews of online risks, apps, and websites
- Training on how to recognize and talk to your child about unsafe online behavior
- To ask online safety experts for reviews of apps and websites

Subscriptions

Parents can choose a subscription:

- [Insights Membership](#)
Free monitoring and reports of the content children are accessing
- **Premium Membership**
A paid subscription from the [App Store](#) or [Google Play](#) to internet filtering and controls

Parents monitor online activity across all of their children and devices from:

- **A Parent's phone or tablet**
Parents download the Family Zone Connect App and access [monitoring reports](#) anywhere, anytime.

Schools and Family Zone

Family Zone works with participating Schools to link a Child's personal devices to the School. Parents and the School can work together to keep a Child safe at home, at School, and while travelling in between.

- [Link a Child's Device to a US School](#)
- [Add or Remove a School in Australia and New Zealand](#)

Advantages

Easy Setup

Unlike online safety products offered by hardware manufacturers and operating system developers, Family Zone works across different types of devices.

The parents only need to access the child's device the first time Family Zone is set up. Default internet

recommendations are based on your child's age group.

Easy Updates

After setup, Parents can view and update the Family Zone monitoring remotely. The Family Zone products synchronize settings in less than 2 minutes.

Parents don't have to worry about new online threats. The Family Zone's online safety experts provide online safety recommendations that are automatically synchronized with all devices protected by Family Zone.

Practical Default Settings

Family Zone requires very little setup. Parents get a recommended default daily schedule based on their child's age group. The default routine each day includes device monitoring for School, Study, Play, and Sleep times.

Family Zone Partner Schools can automatically update the child's school day calendar and routine to match their semester or term dates.
