Parent's app: iOS or Android

Article type: Optional steps

Custom Website Rules

Parents may want to stop their Child from getting to a website they are obsessing over or a website that conflicts with your Family values. You can block access to a website from your phone or tablet.

Block a website

When you block a website, the default blocks the website for all Children in this age group at all times.

You can modify the rule to allow access to the website during a specific daily Routine time (usually during Play time). You also have the option to block this website for all Children in your Family.

On your phone or tablet:

1. In **Family**, tap on *your Child's icon*
2. Go down the screen
3. Tap **Internet filters & rules**
4. Tap **Web categories** and select **Websites**
5. Tap the **ADD WEBSITE** button
6. Enter the "domain name" into the text field

Example: *blockthiswebsite.com*

Domain usually ends in ".com", but can end in other characters like ".io"

The domain name is not case sensitive, but may contain "-" (hyphens)

Do **not** type the https://, http:// or www

Do **not** include the extra characters after the web address (the path) like /shop or /?searchresults

Then tap **SAVE**

Website blocking options

On your phone or tablet:

1. Optional, tap **This profile only** and select **All profiles** to block the website for all **Children**

2. At the **Change are being applied** message, tap **OK**
3. Optional, tap a **Routine** time, such as **School, Study or Play** to allow access at a specific time of day

Blue allows access

Red blocks access

Tap **SAVE**

If your **Child** tries to access the website when it is blocked, they will see an **Access Restricted Message**.

Change website blocking times or remove the rule

As a Parent, you may want to find and change your custom website rules. You can change the time when your Child can access the website or remove the blocking altogether.

On your phone or tablet:

1. In Settings, tap **Internet filters & Rules**
2. Tap **Web categories**
3. Select **Websites**
4. Select *your Child's age group*
5. Tap
 - a. The **Routine** time (Play, School, Study, Sleep) to allow access (blue) or block access (red)
 - b. The **X** to remove the whole rule and allow the default filtering rules

The changes will be synced when your Child's Devices connect to the Internet.

Internet Filters & Rules Options

As a Parent, you may want to customize our recommended Internet filters and rules for:

- Web categories (Dating, Education, Government, Hate Speech ...)
- Search engines, SafeSearch, and streaming media (YouTube, Google, Bing ...)
- Websites (specific web addresses)
- Device features (Camera, In-App Purchases, App Installs ...)
- Alerts and consequences (optional locking devices, parent notifications)
- Social networks and games (Minecraft Online, Skype, Tinder, Twitter ...)
- Advanced (Malware, Piracy, New Websites ...)
