

Google and Bing SafeSearch

Last Modified on 2021-11-05

Applies to: Premium Members

Parent app: iOS or Android

Article type: Optional steps

Age Appropriate Search Results

Change the Search Engine settings to allow your Child to research current events. Or, change your Child's access to search results or search engines.

On a Parent's tablet or phone:

1. In **Family**, tap on *your Child's icon*
2. Move down and tap on **Internet filters & rules**
3. Tap on **Web categories**
4. Select **Search and streaming media**
5. Move down to **Search**
6. Tap on the daily Routine times (**Play, School, Study, Sleep**)
 - Blue allows access
 - Red blocks access

Filtering Search Engines

Parents can allow or limit a Child's access to online search tools and search results.

- **Google and Bing** - allow or block Google and Bing for general searches
- **Mature Search Content** - protect your Child from inappropriate content
- **Other search engines** - allow or block specialty tools for searching message boards, image searches, encrypted and anonymous results

Your Search filters are saved as you make changes and synced with your Child's devices within 2 minutes or less.

Internet Filters & Rules Options

As a Parent, you may want to customize our recommended Internet filters and rules for:

- Web categories (Dating, Education, Government, Hate Speech ...)
- Search engines, SafeSearch, and streaming media (YouTube, Google, Bing ...)
- Websites (specific web addresses)
- Device features (Camera, In-App Purchases, App Installs ...)

- Alerts and consequences (optional locking devices, parent notifications)
 - Social networks and games (Minecraft Online, Skype, Tinder, Twitter ...)
 - Advanced (Malware, Piracy, New Websites ...)
-
