# See Who is Using a Device Connected to the Box

*Applies to: Premium Members*

*Child's devices: Windows, MacOS, Chromebook, Android, iOS, or any device with a web browser*

*Article type: Optional Steps*

## See Who is  Using a Device

A Parent can see who is borrowing a computer or device connected to the Box from their app.

- See or Change a Device Owner

But, what if you don't have access to the Parent app? Use the same **home.tools** diagnostic page to see who is using the Device inside a web browser.

1. Open **Chrome, Safari** or a **web browser**
   Go to http://home.tools
2. At the bottom of the page, click **Troubleshooting stats**
3. Review the listed details
   **Device name**
   **Current user**
   **Borrowed from**
   **Age Profile**
